

Welcome

The modern bathroom is no longer the purely functional room that it once was. It has become a haven from the rigours of a fast paced world, a space to both enjoy and celebrate.

Throughout this catalogue, we are delighted to showcase the diverse range of high quality, affordable products that represent the Synergy brand in order to enable you to create your dream bathroom, your perfect place to:-

relax, refresh, renew.

Toilets and basins

6

Integral to any bathroom, your choice of toilet and basin will reflect your own unique style.

With suites to match every budget in contemporary or traditional styling, the Synergy ranges on the following pages have been selected to provide solutions for even the most challenging of spaces.

From simple, compact and space-saving to elegant and indulgent there is sure to be something you'll find appealing, whether used in conjunction with our furniture or as standalone items our ranges are nothing if not comprehensive.

Listed below is an explanation of the types of pans and basins that are available.

Compact

Reduced projection from the wall makes these pans ideal for smaller bathrooms.

Wall hung

Wall hung pans save space and make floors easier to clean. A concealed frame and cistern will be necessary to enable wall mounting.

Back to wall

Use in conjunction with a back to wall furniture unit and concealed cistern to hide pipework and give a neater finsh.

Shrouded back

The ideal solution for hiding pipework with a floorstanding pan.

Close-coupled

Close coupled cisterns sit neatly on top of the pan to make an integrated toilet unit.

Comfort height

These pans are ideal for taller people or those with mobility issues.

Full access

These pans have increased space at the back to facilitate easy access to pipework.

Soft close seat

The hinge mechanism allows both the seat and lid to close without slamming.

Quick release hinges

Seats with these allow for simple removal and reattaching to facilitate cleaning.

One taphole or two tapholes

Basins can have either one or two pre-drilled tapholes for either a single basin mixer or two separate taps for hot and cold water.

Countertop basin

For use completely on top of a vanity unit.

Semi-recessed basin

Designed to overhang a countertop.

Pedestal

A floor standing pillar for mounting a basin on.

Semi-pedestal

A wall fixed short pillar for mounting a basin on.

Tilly Space saving and practical

Tilly is a modern, compact design perfect for smaller spaces. The short projection pans are available in both conventional and shrouded back close-coupled options with a comfortable seating height of 425mm. A matching soft close D shaped seat is available with a wrap over lid for a neat finish.

The curvaceous basin and full pedestal complete a range that creates a style statement in any bathroom.

Venice Modern and stylish

The Venice range is as comprehensive as it is elegant. With its clean, contoured profile and a choice of three pans, three different basins in two sizes and even the option of full or semi-pedestals. There is sure to be a combination to suit your particular bathroom layout.

The soft close toilet seat has quick release hinges to enable speedy removal and refitting making it incredibly easy to clean.

Marbella Compact and contemporary

Marbella is a comprehensive compact range with a big personality. Including comfort height and full access options, this is a suite that screams indulgence. The large edged 650mm basin is the largest in any of our ranges and can be mounted on either a full or semi-pedestal.

Rimless technology incorporated into the pans provides a full, powerful flush for the entire bowl.

Lyon Seamlessly curvaceous

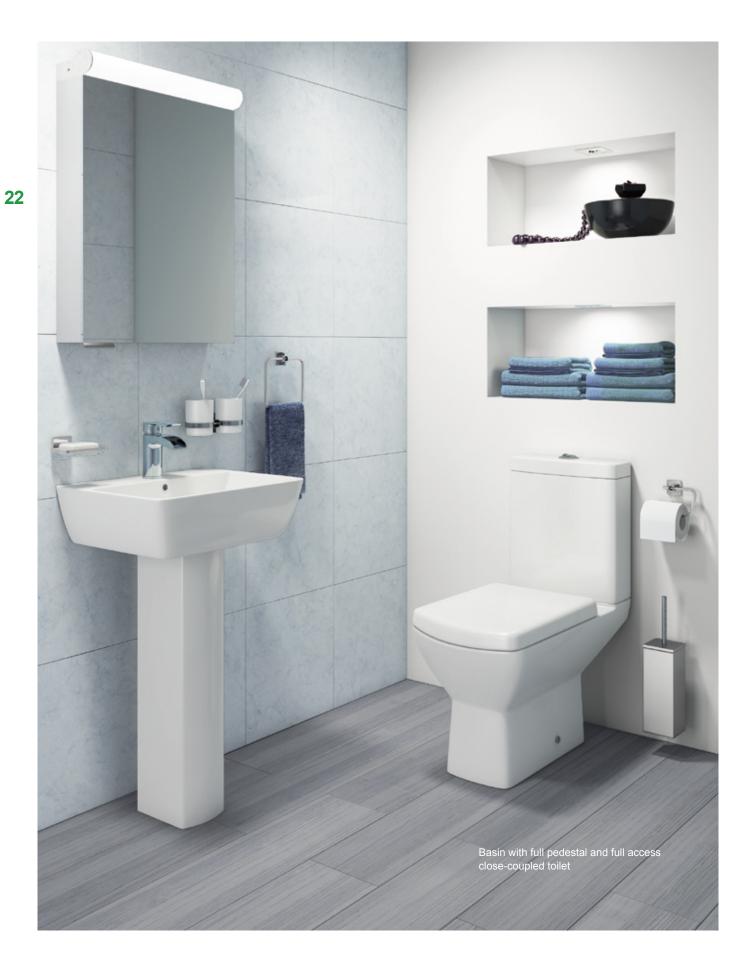

Quick release soft close toilet seat

With round, gently tapering lines, Lyon is a range that would enhance any bathroom. Whichever of the three options you choose, the sleek profile of the pans coupled with the seamless positioning of the seat gives a look that is both practical and aesthetically pleasing. A generous 550mm basin and full pedestal completes a range that is evergreen in its appeal.

Valencia in perfect perspective

Anyone that appreciates angular form will be enchanted by the linear design of Valencia. The 500mm and 600mm basins have thin edges that slope gently to the middle of the bowl, supported by a full or semi-pedestal that closely echoes the subtlety of the design. A soft close, quick release seat is available for the close-coupled or back to wall pan options.

Argon Chiselled good looks

With a thinly veiled homage to Art Deco, Argon is a suite that can be defined as a classic. The bold combination of curves and angles is integral to the design. Wall hung or back to wall pan options and a 550mm basin with pedestal expand the installation possiblilities.

Henbury Timeless elegance

Traditional style will never be out of fashion. In Henbury we showcase a beautiful tribute to the bathroom of the past.

With a delicately fluted architectural design reminiscent of the Edwardian era, the high, low or close-coupled cistern options bring a classic elegance to any bathroom. The 600mm basin is available in both one or two taphole variations, perfect to pair with taps or a mixer from our traditional brassware ranges.

There is a back to wall pan in identical style which would be perfect when used in conjunction with the back to wall unit from our Henbury furniture range. A selection of corresponding traditional taps, showers and accessories are included within the Henbury portfolio and our collection of traditional freestanding baths will also integrate with the Henbury range beautifully.

Furniture

34

The right choice of furniture can define your bathroom, it's no longer just about practical storage solutions. Whether you prefer a cool white finish or the strikingly contemporary "loft" look offered by Berg, you will be sure to find what you are looking for in the next few pages.

From classical to contemporary, in a choice of colours and styles, furniture is undoubtably key to on-trend bathroom design.

Storage is vital to the design of a bathroom, offering a solution to clutter while at the same time adding to the aesthetics of your design.

Such has been the impact of furniture over recent years that it is now included in the majority of new bathrooms.

At the heart of choosing bathroom furniture is your storage requirement. Even a simple vanity unit and a tall unit can maximise the use of redundant space, which is particularly helpful in small bathrooms.

Vanity units are ever popular as a way to provide storage beneath a basin and keep unsightly pipework hidden.

Taller units come into their own where space is limited. The smaller footprint having less impact while providing storage for bathroom essentials. Tall units can also act to semi-partition a bathroom which is particularly useful where it may be used by two people at the same time.

There has been a recent resurgence in the popularity of more traditional furniture. Both Henbury and Paris, our traditional ranges provide a timeless, classic look that will never go out of fashion. At the same time, the industrial trend has had an influence on those seeking more contemporary styling. Our Berg range has a look that utilises the solidity and feel of industrial metal framework from the past with the smoothness of a modern bathroom furniture finish.

With soft closing drawers throughout the ranges coupled with on-trend door colours and textures and maximised internal storage, there's sure to be a furniture style to tick most if not all of the boxes on your wish list.

Float Wonderful woodgrain

Finished in a driftwood effect, the Float range of furniture brings a touch of natural beauty to the bathroom. Complemented by a matching mirror, these wall hung vanity units and storage cabinet are simply gorgeous.

FLOAT

Linea Clean, crisp and stylish

Linea is a design classic, from the soft close handleless drawers and doors to the slightly rounded edges, this is a range of bathroom furniture that is delightfully understated.

Available in both wall hung and floorstanding double drawer vanity units and a tall cabinet with doors and shelving, there is ample storage for all those bathroom essentials.

Nordic Contemporary and stylish

Scandi chic is very much in vogue and certainly to the fore in this versatile range of vanity cabinets. The optional wood grained leg set allows for conversion to a floorstanding unit.

Matching mirror cabinets are also available in three different sizes along with a side storage cabinet. The whole effect can be enhanced by the addition of one of our modern countertop basins to complete the look.

BERG

Paris Vive la différence

Like the city itself, our Paris collection is both stylish and romantic. The elegantly styled legs and accented curves reminiscent of the early twentieth century are a feature throughout the range. Available in both pure white and indulgent black, Paris gives you the opportunity to relive the splendour of 'La Belle Époque'.

Freestanding baths

66

Freestanding baths can be used to create a stunning focal point for your bathroom as well as reflecting your own personality.

They are not a practical solution for every bathroom though, so before you invest in your stylish new tub here are some things you should consider.

Where you position your bath can make all the difference between an elegant and stylish bathroom, and one that looks too cramped. With a larger bathroom this won't be as much of a problem, but if your bathroom is on the smaller side this will need a bit of thinking through.

Consider placing your bath somewhere with enough space around it to store your toiletries (soaps, shampoo, bath oil, etc) and maybe even a laundry basket. This will ensure that there's enough room for your bathroom to look less cluttered.

For those with smaller bathrooms, maybe choose a slipper bath which tend to fit smaller rooms better and create the illusion of space.

Freestanding baths act as a statement piece in any bathoom, but the kind of statement very much depends on the style of bath you go for.

Decide whether you want your bathroom to have a contemporary or traditional look. If you're looking for something modern you might want to choose a bath with a thinner edge or a coloured finish. For a traditional look, you can never go wrong with a bath featuring classic ball and claw feet.

At Synergy, we are proud to showcase our stunning range of freestanding baths all of which can be perfectly complemented by our range of fittings, accessories and taps. Freestanding baths are arguably the defining feature of a traditionally designed bathroom, while also becoming popular in modern households. The freestanding bath combines an opulent appearance and elegant curves with a powerful presence, helping to create an iconic bathroom. Ideal for those with more classic tastes, our baths incorporate timeless design features for style and functionality.

Our baths come in a variety of styles and sizes both large and small, modern and traditional. Some can be drilled for tapholes and some can only be used with a freestanding bath filler. All of our traditional baths come with ball and claw feet where appropriate but you will need to purchase a waste and overflow separately

We hope you enjoy browsing our comprehensive selection of freestanding baths and, which ever style you choose, that it brings you pleasure for years to come.

Baths

84

Throughout our bath range there is sure to be a solution to your bathing requirements.

We have shower baths in both P shaped or L shaped styles with options to position the shower area at either the right or left end of the bath depending on your bathroom layout.

There are baths with the tapholes at the end and baths with tapholes positioned centrally, we even have baths without tapholes so that you can position the taps where you wish.

Completing the range are a choice of shaped and corner baths that may be more in keeping with your available space.

Many of the Synergy baths are available in either standard finish or premier finish. Premier finished baths, although slightly more expensive, have a heavily reinforced finish on the underside of the bath which provides an 'armour' coating for exceptional strength and heat retention. Look out for the premier strength symbol throughout the following pages.

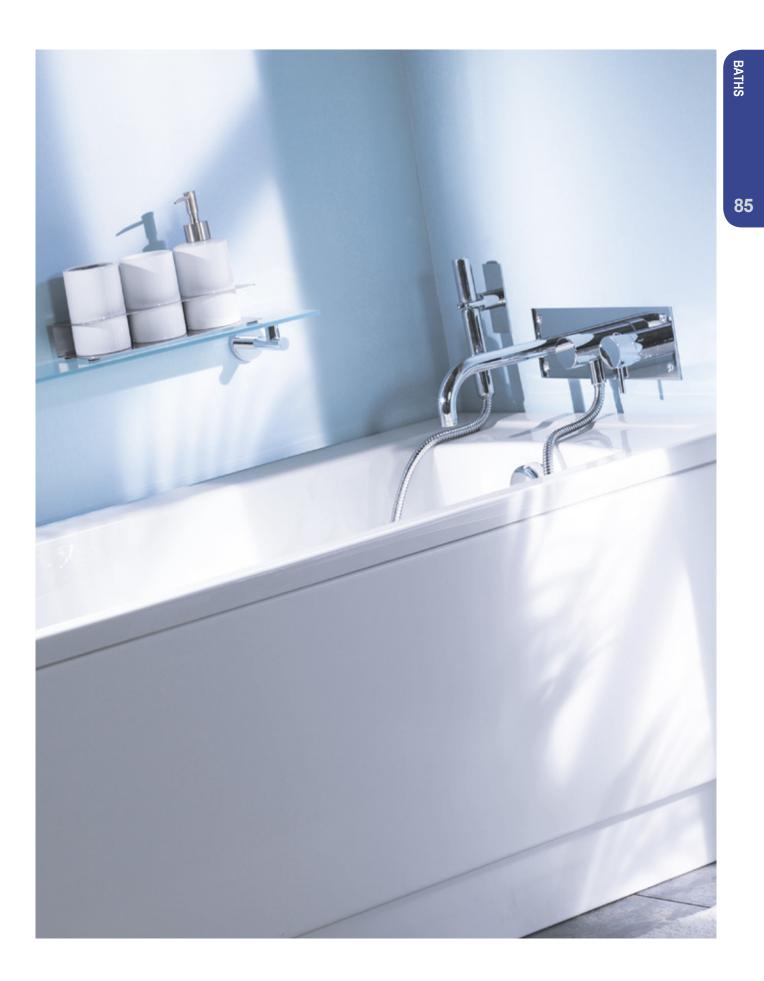

All our baths come without wastes or overflows and you will need to buy bath panels to complete the look of your bath. A selection of both wastes and panels are featured at the end of the bath section of this catalogue. Panels are available in Halite which is a revolutionary new finish that is light weight and fully water resistant.

Regardless of which bath you choose, you can relax in the knowledge that all Synergy baths are manufactured to rigid standards and most of them are made right here in the United Kingdom.

Please enjoy browsing and remember to check out our showers, taps and screens for the perfect accompaniment to your new bath.

PREMIER STRENGTH BETTER HEAT RETENTION Look out for this symbol for baths available in our superior **Premier** finish

What material is Halite made of?

Halite panels are constructed from a top quality UV stable expanded vinyl material known as Foamboard. This high density PVC board is rigid and durable whilst still being lightweight and flexible.

PVC board is used for a variety of applications, one of the most popular being outdoor shop signage. This is due to it withstanding all of the elements but still remaining in good condition.

Advantages of Halite over MDF panels

- 100% waterproof
- No swelling or bubbling like laminated MDF
- Lighter and easier to install
- · UV resistant, durable and scratch resistant

BATH SCREENS

Enclosures

100

An invigorating shower has become the most popular way to start the day, enabling the shower enclosure to become a fundamental bathroom essential. Designs have developed over recent years and are less generic and more of a feature; for a contemporary feel choose a frameless option or illuminated glass to create a beautful ambience. We have styles and sizes to suit any bathroom space, all manufactured to the highest quality standards.

Vodas 6 framed enclosures

All our Vodas 6 enclosures are made from high quality 6mm toughened safety glass.

Vodas 8 framed enclosures

All our Vodas 8 enclosures are made from high quality 8mm toughened safety glass.

Both Vodas 6 and Vodas 8 framed enclosures include the following:

Chrome plated top cover caps for the doors.

Metal handles.

Easyclean glass - a special coating that is applied at the factory which seals microscopic holes to prevent limescale and soap deposits.

Adjustable wall profiles for uneven walls.

Quick release double roller system which allows removal of the runners from the track at the bottom of the enclosure for easier cleaning.

Soft closing magnetic door seals to ensure the doors shut tightly.

Profiles tested for use with power showers.

There are extension profiles available for most Vodas 6 and Vodas 8 framed enclosure doors to ensure a perfect fit when installing in a non standard opening.

Vodas 8 frameless enclosures

Frameless enclosures are made from high quality 8mm toughened safety glass. They feature a top roller system to give a sleeker, more open appearance. All Vodas 8 frameless enclosures benefit from the same features as the framed enclosures with the addition of:

Capture profiles - when used in a recess, frameless enclosures have no wall channel on the closing side so include a channel in the profile to maximise water retention.

Vodas 8 Stella enclosures

Hinged frameless enclosures with 8mm easyclean toughened glass available in both black and chrome finishes.

Vodas 8 walk-in panels

Modular shower panels made from 8mm easyclean toughened glass for use with or without a shower tray. Extension and support brackets are available to buy separately.

Vodas 10 wetroom panels

Made from 10mm easyclean toughened glass for use both with or without a shower tray. Available in both clear and mirror finishes. Extension and support brackets are available to buy separately.

Vodas illuminati wetroom panels

LED lit wetroom panels made from 8mm easyclean toughened glass for use with or without a shower tray. These panels include a telescopic support bar, a transformer and relevant wiring.

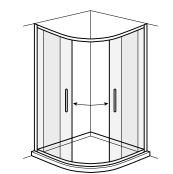

Vodas wetroom kits

A complete system to create a simple, cost effective wetroom. Available in a variety of sizes, the kit has all you need to create a waterproof wetroom floor. Just add your choice of enclosure or wetroom panels from the Vodas range.

Adjustable profiles

If the space you wish to install your enclosure is less than the standard sizes we offer or if the walls are slightly uneven, you can use the adjustment available on each profile to make a good fit.

On every size enclosure there are adjustable profiles. This means that the enclosure may be altered slightly to achieve the desired fit, in order to fit a smaller space of up to 40mm less than the stated size of the enclosure.

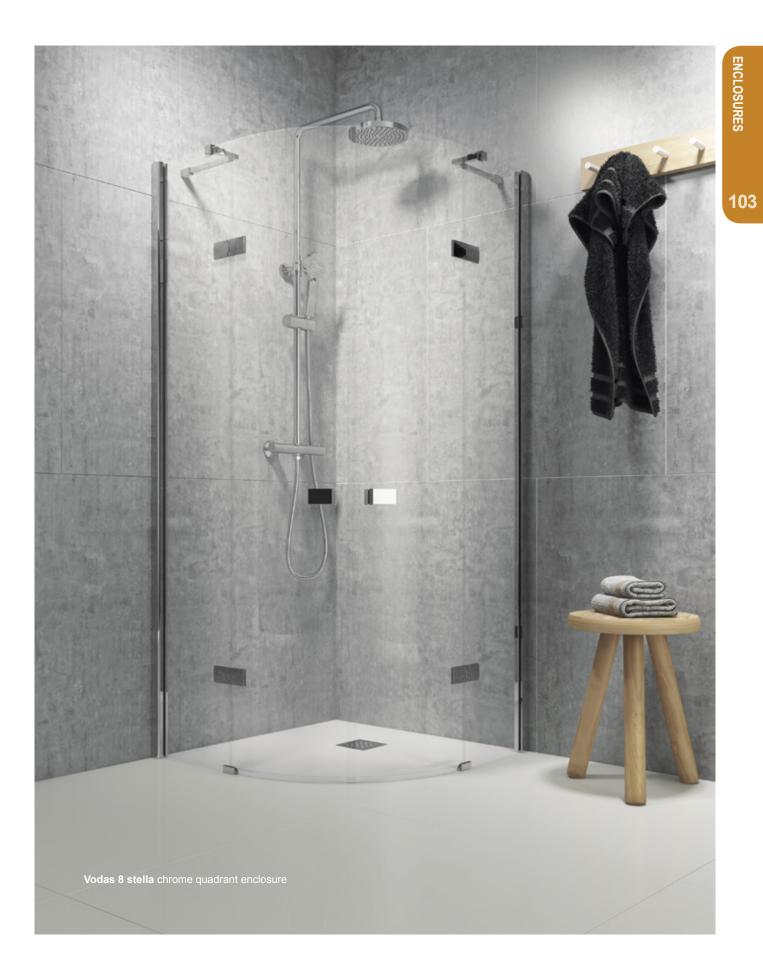

How is this possible?

There is space within the wall profile where you can align your door, either very close to the wall or further away. Adjustment only reduces the size of the enclosure, thus, the largest size for adjustment is the actual measurement of the enclosure.

As an example: If you purchase a Vodas 6 framed 1000mm sliding door enclosure. The profiles of the enclosure can be adjustede to fit a space between 950mm - 990mm.

Adjustment can also be used if you have uneven walls, perhaps because you have an older property.

- Every enclosure can be adjusted by up to 40mm less than the stated enclosure size.
- · Adjustments can only decrease your enclosure size.
- Adjustments can be used if you have uneven walls or an irregular space.

104

Vodas 6 optional side panels

These may be necessary for use with the sliding door, pivot door or bifold door when installing outside a recessed space to create an enclosure.

A complete system designed to allow the simple and cost effective creation of a wetroom shower.

The three main issues encountered when creating a wetroom are forming a gradient, drainage and waterproofing, all three have been addressed simply and successfully in these products

Choose and install the wetroom kit that is nearest in size to your proposed wetroom area, install the included drainage gully and then make the area watertight using the tanking kit.

1 Before

In a traditional bathroom, space is restricted and the room can seem cluttered.

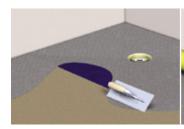

2 After

The open design of a wetroom creates a clean and uncluttered look that adds a touch of luxury.

Wetroom kit

The tanking kit includes:

- 5m x 1m waterproof matting
- 1 x external preformed corner
- 4 x internal preformed corners
- 12.5m jointing tape

Apply tile adhesive to your floor former or floor substrate using a small notched trowel.

Place the tanking kit onto the floor and smooth out using the flat edge of the trowel.

Press the tanking kit into the waste base plate and secure with the clamping kit.

Using the jointing tape provided,

Using the jointing tape provided, cover all joints and fit preformed corners. Tile as normal.

Showers

118

Showers have become the premier choice for the modern bathroom. What better way to start your day or wash away your troubles and relax after a hard day than the exhilaration of a refreshing shower.

The Synergy shower collection offers something for everyone. Whether you are looking for a complete ready to install shower system or wish to build your own bespoke shower using thermostatic valves, we have a comprehensive choice of styles from ceiling mounted fixed shower heads to riser rails and handsets. For a coordinated look, all our shower systems and valves have tap ranges in complementary styles.

As well as good looks, our showers are designed with safety in mind and built to the highest quality standards. There are also additional features that are either built-in or can be combined into your shower design like bodyjets, waterfalls and shower heads incorporating a digital temperature indicator.

With both contemporary and traditional styles, some in finishes that offer an alternative to conventional chrome, there is sure to be a shower that will match your personality and enhance the look of your bathroom or wetroom.

Not all showers are suitable for every home, some work perfectly well on lower pressure systems but some will only work at a minimum pressure which is measured in Bar.

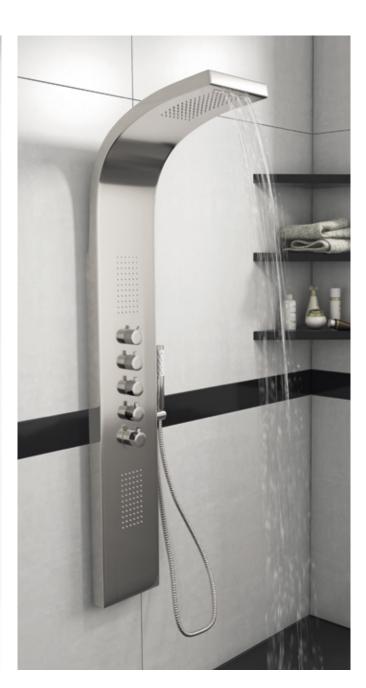

To help identify which showers are compatible with your particular water system, we have indicated the minimum working pressure for each shower on the following pages.

Spinnaker

Minimum 1.0 bar

Thermostatic tower shower

This tower shower is multifunctional, efficient and looks great. With multiple body jets, a hand shower and a powerful fixed head, you can relax in your shower and let the water cleanse your body from all angles. The modernistic controls make it easy for you to turn your everyday bathroom routine into a luxurious tower shower experience.

Taps and mixers

138

After taking considerable time and effort to choose your perfect bathroom, it would be a shame not to complement it with the perfect taps and mixers. Long gone are the days when bathroom taps were a minor detail, they are very much now seen as the finishing touch, elevating your bathroom from mediocre to magnificent.

The Synergy range of taps are as diverse as they are beautiful, from wall mounted mixers to freestanding bath fillers, there will be something to enable you to express your own individual personality on the way your bath or basin is filled.

Most of our taps are designed for use with the low pressure systems most common in UK households and all are manufactured to rigid quality standards.

Although a chrome finish is very much the established preference for taps, we now have several options available in a more contemporary sleek black finish for those wanting to be a bit more daring or wishing to echo the black finish of our enclosures or showers.

Some basin mixers are fitted with our ecoclick water flow regulator to limit the flow rate and save water. Look out for the ecoclick logo on selected products.

There are various types of plumbing and heating systems in UK homes which dictate what type of pressure ratings are required for taps and mixers.

To help identify which taps and mixers are compatible with your particular water system, we have indicated the minimum working pressure for each product on the following pages.

Heating

166

Radiators have come to be integral to modern lifestyles. Long gone are the days of the unattractive corrugated panel that was purely seen as a heat source.

Modern radiators and towel rails have evolved into decorative features that create a statement piece in any room.

Designer radiators

Designer radiators add style and comfort without compromising functionality. With contemporary styling, efficient heating, simple installation and a variety of sizes and colours, designer radiators can maximise your available space and turn your home heating into a thing of beauty.

Our stylish collection of designer radiators offer so much more than just a source of heat. An attractive alternative to standard radiators, designer radiators are both practical and efficient while enhancing the decor of your room.

Towel rails/warmers

Now the go to choice for the modern bathroom, towel rails are available in a multitude of different styles and sizes. As well as the conventional chrome, some of our towel rails are available in black or white. There are several more traditional towel warmers in the Warmbase range that are specifically designed to complement our Henbury ranges of Sanitaryware, furniture and brassware.

All our LoCo towel rails are suitable for conversion to electric or dual fuel use. Please see the end of the section for details.

Valves

A selection of valves are available to fit all the radiators and towel rails in the Warmbase range. From contemporary to traditional styling, your choice of valve can provide the finishing touch to the look of your new radiator. Throughout our collection of designer radiators, be sure to consider the following features: -

Vertical radiators for use where wall and floor space is at a premium.

Horizontal radiators fit a more contemporary profile but with added design flair.

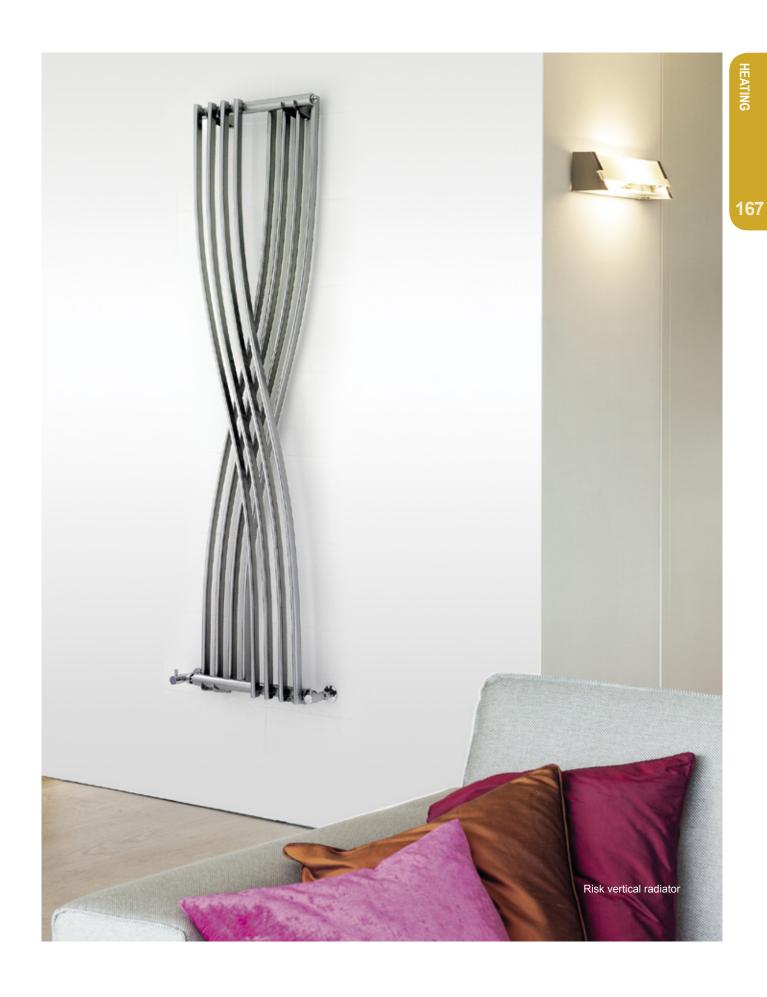

BTU output – BTU stands for British Thermal Unit and is a guide to how much heat the radiator will generate.

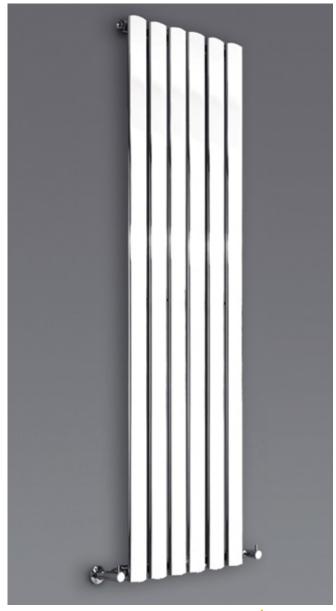

The wattage (W) is the amount of power the radiator uses.

Single, double or triple radiators, designed to increase heat output without increasing the radiator footprint

Discover the stunning collection of Warmbase radiators on the following pages and treat your home to an upgrade in warmth and style.

Underfloor heating

There's nothing that compares with the comfort of underfloor heating, especially in the cold winter months. Imagine stepping out of the shower onto a tiled floor that is heated to the exact temperature you prefer.

Electric underfloor heating works by gently heating the floor which in turn warms the complete room. The warm**base** underfloor heating kits are quick and easy to install and are ideal when fitting a new bathroom or kitchen.

Everything you need is provided in one box for a quick and easy heating solution. Our electric underfloor heating kits are ideal for self build, renovations and extensions.

- 3.5mm simple installation mat
- Durability guarantee with a 10 year warranty
- Heating cable has exceptionally small profile
- Intelligent thermostat for accurate temperature control
- Invisible heating for ultimate flexibility

Each box contains

- · The correct sized heating mat
- Digital touch screen clock thermostat
- Floor sensor
- · Floor sensor mounting pipe
- Comprehensive installation manual
- Control card

The completely programmable thermostatic controller puts you firmly in control, allowing you to regulate the temperature and control when the system comes on and goes off. A manual override means you can raise or lower the temperature as needed.

Insulation sheets provide an essential function for the economic operation of your installation throughout its lifetime. They significantly reduce energy consumption and improve floor "heat up" times.

Insulation sheets are suitable: • Under laminate / wood floors • As wall insulation

3mm - 1.2 x 0.8M 6mm - 1.2 x 0.8M SY-2437/VYSA £13.00 SY-2438/VYSA £17.00

Insulated tile backer board has been developed specifically to provide the thermal insulation needed to prevent the heat loss of tile and stone floors. Tile backer board can be fitted directly over floor boards, chipboard and concrete floors and is an excellent addition to any underfloor heating system.

Tile backer board can be used to prepare an uneven sub-floor instead of using a latex self-leveling floor smoothing compound.

Mirrors & cabinets

196

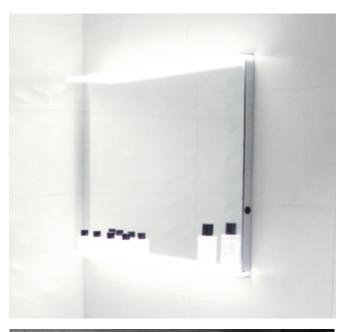

Let's just have a moment of reflection. Whether it's just to tidy your hair or carry out your daily shaving regime, a mirror is a mainstay of any bathroom. The Synergy collection includes mirrors and cabinets with and without integrated lighting, shaver points, clocks, demisters or infra red switches.

Our mirrored bathroom cabinets all come with shelving to accomodate those essential lotions and potions that you may prefer not to be on display.

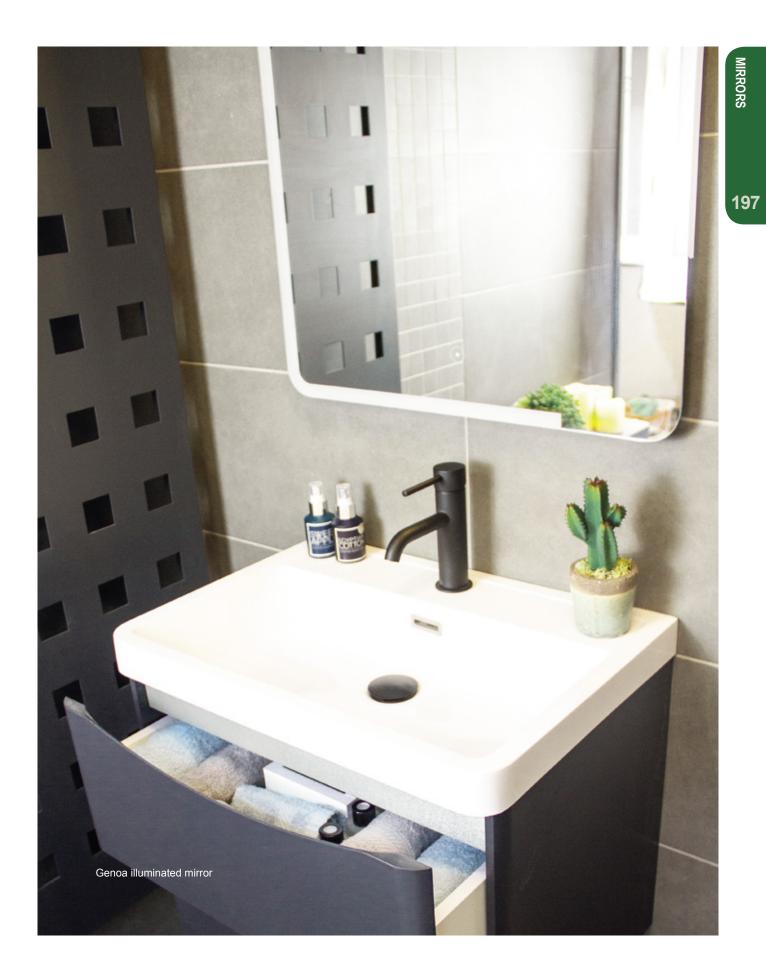

All the mirrors and cabinets on the following pages that include electrical components are manufactured to conform to IP44 safety standards.

Finishing touches

206

Now you've taken so much care in selecting the main components of your new bathroom, it would be an absolute shame not to take the same consideration over the detail that will bring your entire scheme together.

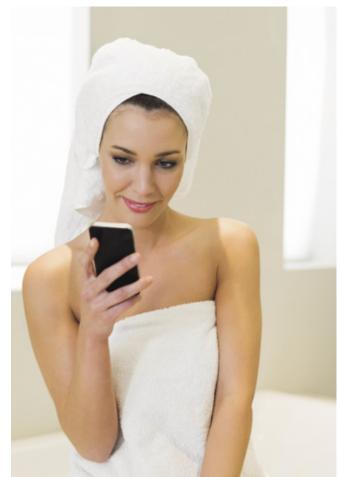

From lighting and flooring right down to a humble toilet roll holder, the way that the bathroom is dressed and accessorised can make all the difference to the completed effect.

The Synergy products on the following pages have all been purposely chosen to integrate with the other items in the catalogue whether the style be contemporary or traditional. We even have a selection of bathroom televisions and bluetooth speakers to enhance your bathing or showering experience.

All our electrical accessories conform to the British standards for use in steamy and wet environments.

Take your time, select carefully and you will have a bathroom to be proud of with flooring, accessories and lighting that add that final flourish and create that elusive wow factor.

At just 40mm thick, our stunning Trinity bathroom televisions feature high-bright LED screens, built-in Freeview HD, HDMI and USB connections. Designed to inset into the wall surface, the 6mm glass screen then sits directly flush to the wall.

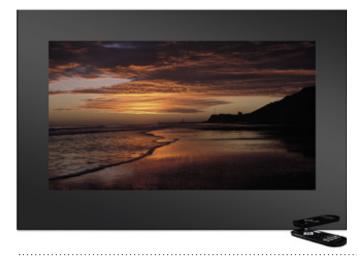

Available in a choice of 17", 24" 27" & 32" wide-screen options, the heated glass screen ensures that condensation doesn't spoil your viewing pleasure and the waterproof remote control reduces the worry of dropping it into the bath. There is the option of a dark mirror or smoked black glass finish, allowing the tv screen to disappear when the unit is switched off.

With built-in Freeview HD tuners you can easily toggle between your favourite tv & radio stations. HDMI and USB ports make the addition of a Smart tv dongle simple and affordable.

Key features:

- High-bright, LED LCD TFT Panel
- Freeview HD (DVB-T2 tuner)
- · Heated, toughened glass screen
- · Choice of smoked black or dark mirror finish
- IPX6 rated suitable for wet areas
- · Connects to separate ceiling speakers
- 2 x HDMI + USB + audio out + speaker out + RS232
- · Includes back box, waterproof remote & 2 x ceiling speakers

Soundbathe bluetooth bath speaker

Soundbathe transforms any bath into a bluetooth speaker, for a truly immersive experience.

The Soundbathe works by transferring vibration energy through your bathtub and converting the vibrations into sound waves. This effect means that you not only hear the music, but you feel the vibrations too.

Quick and easy to install, there's no drilling of the bath required and once the bath panel has been fitted, you won't even know it's there. Simply take your bluetooth enabled smartphone or tablet and pair up with the system before lying back and enjoying the sensation that your bath has been turned into a giant speaker.

Waterproof grade IPX4 (suitable for bathrooms)

Box contains: $2 \times a$ waterproof speakers, amplifier, cabling and user manual.

Bluetooth bath speaker TVBTB40W02 **£479.00**

Bluetooth ceiling speaker

This splash-proof ceiling speaker can easily be installed in your choice bathroom. Simply connect and use the controls on your bluetooth device to stream your stored music or music app.

We recommend that only one of these speakers be installed per household, so as to avoid interference from multiple units.

Whilst you can connect multiple devices to this speaker, the speaker will only be recognized by one device at a time, so as to avoid conflict.

Bluetooth ceiling speaker TVBTCS225 £195.00

LVT flooring

	Luxury vinyl tiling	Coverage	Code	Price
	Champagne oak panels	1.74 sq. metres per pack (£60.35 per m ²)	SY-CPO863	£109.00
	Grey oak panels	1.74 sq. metres per pack (£60.35 per m ²)	SY-GR0704	£109.00
	Summer oak panels	1.74 sq. metres per pack (£60.35 per m ²)	SY-SMO136	£109.00
224	Perlato stone tiles	1.86 sq. metres per pack (£56.45 per m ²)	SY-PLS718	£109.00
	•••••••••••••••••••••••••••••••••••••••			

What material is LVT flooring made of and how do they work?

Synergy luxury vinyl tiling is made from heterogenous polyvinyl chloride which is approved for use in wet areas. Similar to conventional laminate flooring, LVT tiles and floor panels are joined using UNICLIC patented technology to create a waterproof join, they are lighter in weight than laminate and can be cut with a craft knife.

The advantages of LVT flooring?

Uniclic easy click technology Install without glue 100% waterproof Wet area suitable Stain resistant and easy to clean Colourfast to UV light Embossed surface Warm and quiet underfoot R9 slip resistant Sound absorbent 100% virgin vinyl Ideal for high traffic areas like bathrooms

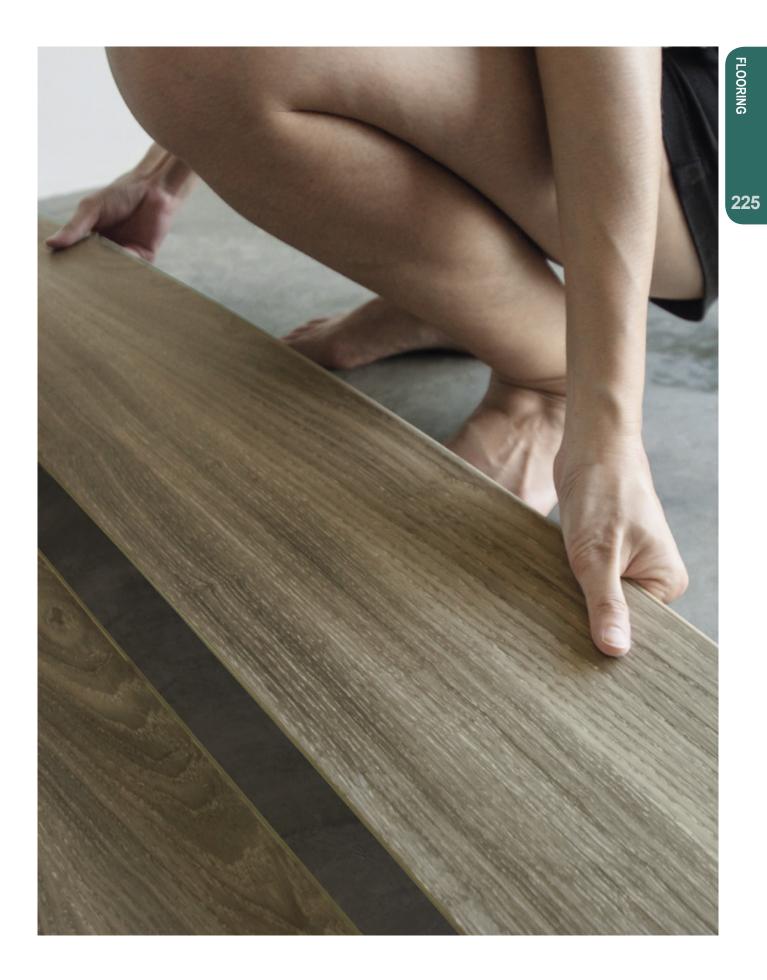

The colours shown above are as accurate as colour print processes allow.

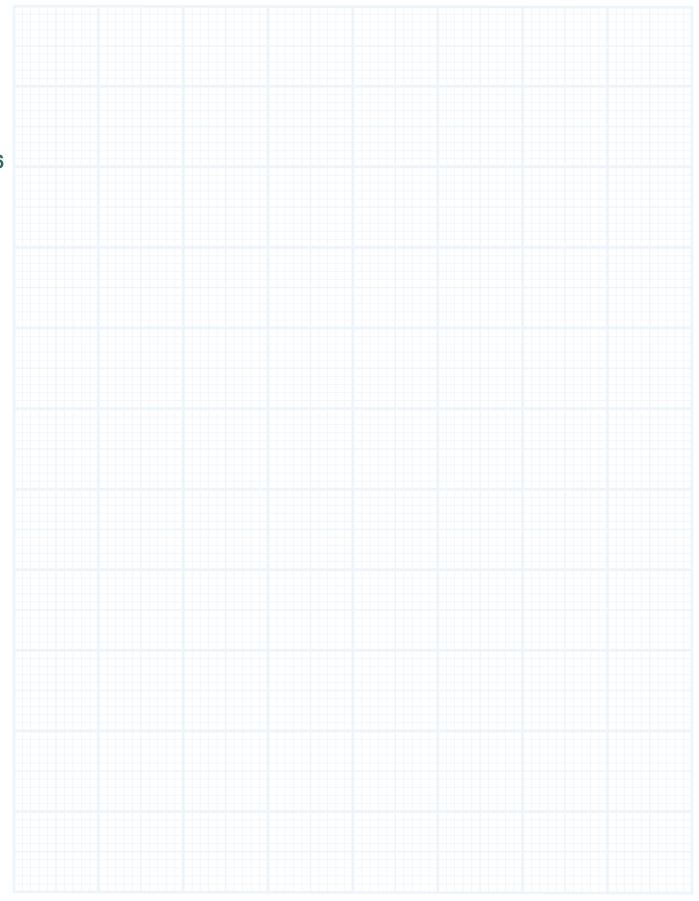

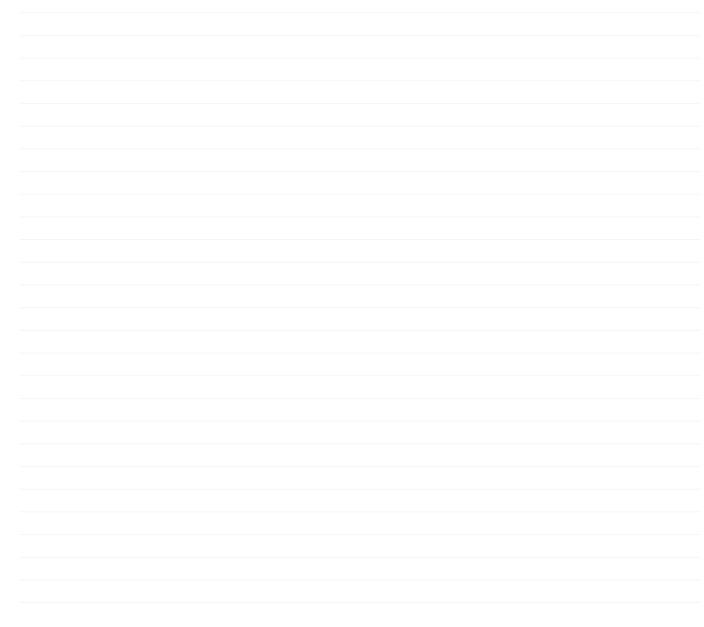

Notes

Guarantee

We guarantee our products against faulty materials or manufacture for life provided they have been installed, used and regularly maintained in accordance with our instructions.

All working parts such as hinges, ceramic discs, cartridges, seals and cistern fittings, which are subject to normal wear and tear, are covered for 12 months from proof of purchase date.

Our guarantee applies to the original purchaser only and is nontransferable. Should you raise a claim, the issue will be investigated. As part of the investigation we request that the following conditions be satisfied:

- Proof of purchase at the time of claim.
- The product has been maintained and cared for in compliance with our instructions (including regular and appropriate cleaning). If in our opinion the product has been modified, misused or accidentally damaged, we can accept no responsibility for failure.
- The opportunity to inspect the product in the installed condition.

Faulty items will be replaced with our nearest equivalent product.

This guarantee does not affect your statutory rights. This guarantee is only applicable in the UK and Republic of Ireland.

As a continually evolving company we reserve the right to change product specification without prior notice. Prices are valid on orders placed from 1st July 2019. Under current world market conditions, costs can be extremely volatile and we reserve the right to review prices at any time.
